

## **Press Release – For Immediate Release**

### **E-commerce Boost Sends MHI Sales Rocketing**

Europe's largest Independent International Mail Routers, Mail Handling International, have seen 2012 close out recording phenomenal growth.

Reporting a year-end revenues increase of nearing 33% and an increase in both gross & net margins. The newly released figures are above the growth forecast of 25%.

Additional & significant new client wins in the Publishing Industry have augmented gains from their E-Commerce Platform ECROS. This award nominated software is now in use in multiple sites in the UK as well as in the USA – least cost routing & managing on-line sales deliveries.

Paul w Brown commented "the e-Client sector has been a key attribute and contributor this year. ECROS really is the future for the on-line sales markets – bring unrivalled tracking options even for normal mail products. MHI delivering yet another year of growth in an undoubtedly challenging market".

Gary Barnett added "Above target sales growth is always a fantastic result. The advancement in our software platforms places MHI as the definer of mail handling well into the future".
